(PDF) NONLINEAR SPEECH PROCESSING: OVERVIEW AND

advanced speech applications european research on speech technology Speech synthesis is the artificial production of human speech. A computer system used for this purpose is called a speech computer or speech synthesizer, and can be implemented in software or hardware products. A text-to-speech (TTS) system converts normal language text into speech; other systems render symbolic linguistic representations like phonetic transcriptions into speech.

advanced speech applications european research on speech technology Advanced Audio Coding (AAC) is an audio coding standard for lossy digital audio compression. Designed to be the successor of the MP3 format, AAC generally achieves better sound quality than MP3 at the same bit rate. The confusingly named AAC+ does so [clarification needed] only at low bit rates and less so at high ones.. AAC has been standardized by ISO and IEC, as part of the MPEG-2 and MPEG-4 ...
