an introduction to forecasting weather classic reprint Economic forecasting is the process of making predictions about the economy. Forecasts can be carried out at a high level of aggregationâ€”for example for GDP, inflation, unemployment or the fiscal deficitâ€”or at a more disaggregated level, for specific sectors of the economy or even specific firms.. Many institutions engage in economic forecasting: national governments, banks and central ...

an introduction to forecasting weather classic reprint It was not until the invention of the electric telegraph in 1835 that the modern age of weather forecasting began. Before that, the fastest that distant weather reports could travel was around 100 miles per day (160 km/d), but was more typically 40–75 miles per day (60–120 km/day) (whether by land or by sea).
