auto heating and air conditioning Control Circuits for Air Conditioning & Heating - How It All Works - Transformers. Step down transformers are used for air conditioning and heating systems to step down the voltage from a line voltage to a safer and more efficient voltage for use in the control of the system.

Control Circuits for Air Conditioning & Heating | HVAC

auto heating and air conditioning Radiation and convection. Heat transfer from a radiator occurs by all the usual mechanisms: thermal radiation, convection into flowing air or liquid, and conduction into the air or liquid. A radiator may even transfer heat by phase change, for example, drying a pair of socks. In practice, the term "radiator" refers to any of a number of devices in which a liquid circulates through exposed pipes ...
