biodiversity in enclosed seas and artificial marine habitats proceedings of the 39th european marine biology symposium held in genoa italy 21 24 july 2004 A cilium (from Latin, meaning 'eyelash'; the plural is cilia) is an organelle found on eukaryotic cells and are slender protuberances that project from the much larger cell body.. There are two types of cilia: motile cilia and non-motile, or primary, cilia, which typically serve as sensory organelles. In eukaryotes, motile cilia and flagella together make up a group of organelles known as ...
