observing handbook and catalogue of deep sky [Observing the Arps] [Summary Data] Introduction This page illuminates the catalog of 338 peculiar galaxy views gathered by Dr. Halton C. Arp in his Atlas of Peculiar Galaxies. The Atlas is a selection of unusual or peculiar galaxies, interacting pairs or larger groups.. As amateur telescopes grow in capability and CCD cameras are becoming more sensitive and affordable, amateur astronomers can ...

observing handbook and catalogue of deep sky Deep-sky object (abbreviated as DSO) is a term designating any astronomical object that is not an individual star or Solar System object (such as Sun, Moon, planet, comet, etc.). The classification is used for the most part by amateur astronomers to denote visually observed faint naked eye and telescopic objects such as star clusters, nebulae and galaxies.

observing handbook and catalogue of deep sky The Butterfly Cluster (cataloged as Messier 6 or M6, and as NGC 6405) is an open cluster of stars in the southern constellation of Scorpius. Its name derives from the vague resemblance of its shape to a butterfly. The Trumpler classification of II 3 r indicates it is rich in stars (r) with a high concentration (II) and a large range of brightness (3). It is positioned 3.5° to the northwest of ...

observing handbook and catalogue of deep sky Introduction. This manual is the basic textbook for anyone writing an ASTM standard. A study of Parts A, B, C, or E will show the proper form for the principal types of standards including a detailed explanation of how to write each section, from the title to the appendixes. Within Parts A, B, C, and E, the first section lists the preferred sequence of headings and indicates whether these ...
