plant pest risk analysis concepts and application The analysis phase examines two major parts of risk, exposure and effects, and their relationship with each other. The process for examining effects is called ecological effects characterization, whereas the process for examining exposure is called exposure characterization. During the analysis ...

Technical Overview of Ecological Risk Assessment

plant pest risk analysis concepts and application Etymology. The infraorder name Isoptera is derived from the Greek words iso (equal) and ptera (winged), which refers to the nearly equal size of the fore and hind wings. "Termite" derives from the Latin and Late Latin word termes ("woodworm, white ant"), altered by the influence of Latin terere ("to rub, wear, erode") from the earlier word tarmes. Termite nests were commonly known as ...
