problem solving strategies crossing the river with dogs and other mathematical adventures The executive functions are among the last mental functions to reach maturity. This is due to the delayed maturation of the prefrontal cortex, which is not completely myelinated until well into a person's third decade of life. Development of executive functions tends to occur in spurts, when new skills, strategies, and forms of awareness emerge.

## **Improvement of Scrap Request Process with Six Sigma**

problem solving strategies crossing the river with dogs and other mathematical adventures This is a complete lesson with teaching and exercises, showing how division can be seen as repeated subtraction. It is meant for third grade. Students solve divisions by 'subtracting' or crossing out equal-size groups from the total in the visual model, until there is nothing left. Examples show how divisions can be solved by repeatedly subtracting the same number (the divisor).

## **Division as repeated subtraction - a complete lesson for**
