whales dolphins and seals pdf

whales dolphins and seals a field guide to the marine mammals of the world Cetaceans (/ s ɛˈt eɪˈf ɛɪˈn s /) (from Latin: cetus, lit. 'whale', from Ancient Greek: ἰχθύς, translit. ikhthys, lit. 'huge fish') are aquatic mammals constituting the infraorder Cetacea. There are around 89 living species, which are divided into two parvorders. The first is the Odontoceti, the toothed whales, which consist of around 70 species, including the dolphin (which includes ...

Cetacea - Wikipedia

whales dolphins and seals a field guide to the marine mammals of the world The toothed whales (systematic name Odontoceti) are a parvorder of cetaceans that includes dolphins, porpoises, and all other whales possessing teeth, such as the beaked whales and sperm whales. Seventy-three species of toothed whales (also called odontocetes) are described. They are one of two living groups of cetaceans, the other being the baleen whales (Mysticeti), which have baleen instead ...

WASTED CATCH: UNSOLVED PROBLEMS IN U.S. FISHERIES - Oceana

whales dolphins and seals a field guide to the marine mammals of the world Why were baleen whales hunted? Early humans hunted whales for food and oil. But in the 19th and early 20th centuries, before the invention of plastic, whales were hunted commercially for their baleen or "whalebone" as well as for their oil.

National Marine Mammal Laboratory

whales dolphins and seals a field guide to the marine mammals of the world Killer whales, or Orcas (Orcinus orca) are cetaceans. They are the largest dolphins in the world, called 'whales' because of their size. Orcas have mostly black skin with white patches. They are found in all the world's oceans, from the cold of the Arctic to the tropical seas. They are easy to identify because of their distinctive white and black colouring. They live in pod
